Online Course LMS - Client Demo Handout (1 page)

What this system does

- Students complete online modules (video/content + timed quiz) after deposit is paid.
- Each module can require a custom passing score and limited attempts (default: 90%, 1 attempt).
- Passing all modules unlocks in-person eligibility and issues a course certificate.
- Admins monitor progress, review quiz attempts, reset/override modules, and manage certificates.

Demo flow (12-15 minutes)

- | | |
|------------------------------|--|
| 1. Admin setup | Classes > Course Modules: add content, PDF materials, quiz questions, pass % & max attempts. |
| 2. Deposit unlock | Unpaid booking cannot open online course. Mark Deposit Paid > course unlocks. |
| 3. Student start | Student > My Online Courses: progress % bar + Continue button. |
| 4. Module + materials | Open module: lesson content, downloadable PDF, quiz rules shown. |
| 5. Timed quiz | Start Quiz > countdown timer, one question at a time, no going back. |
| 6. Pass / fail | Pass unlocks next module. Fail: no free retake; answers hidden until admin reset. |
| 7. Admin oversight | Class > Blended Progress: Review answers, Override pass, or Reset for re-enroll. |
| 8. Certificate | All modules passed > student certificate. Admin > Certificates: search, print, revoke. |

Key rules to remember

- Online access requires deposit paid or fully paid booking.
- Quiz timer is live (server-side). Leaving the page does not pause the clock.
- Failed attempt = contact admin to re-enroll/reset after questions are updated.
- Certificate issues only when every required online module is completed (or admin override).

Login URLs (local demo)

Admin: <http://127.0.0.1:8000/admin/login>

Student: <http://127.0.0.1:8000/student/login>

Prep checklist before the meeting

- Use 2 browser windows (Admin + Student Incognito).
- Prepare a blended class with 2 short modules (2-3 quiz questions each).
- Upload 1 sample PDF; set clear pass % / attempts on Module 1.
- Have one deposit-paid student ready for a fast pass path.
